

Omar Garcia Rios

Full Stack Software Engineer

Barcelona, Spain

contact@omargarrios.dev LinkedIn GitHub

I'm a full-stack engineer in Barcelona with 7+ years of professional experience building web platforms, backend services, and mobile apps. At Prototyp I've built products for clients in fundraising, education, finance, and applied AI.

I'm especially drawn to backend engineering and complex integrations, with a close eye for the interface people actually use.

Education

Bachelor's Degree in Informatics Engineering 2015 – 2019
[Software Engineering Specialization](#)
Universitat Politècnica de Catalunya (UPC) · Barcelona, Spain

Languages

Spanish	Native
Catalan	Full Professional Proficiency

- Docker & Containerization

Frontend & Mobile

- React / Next.js
- Flutter & Dart
- React Native
- Vue.js / Nuxt
- TypeScript & JavaScript

Applied AI

- LLM Integration & Prompt Pipelines
- Agentic Development (Claude Code, Codex, Copilot), custom skills & rules

Experience & selected work

Full Stack Developer · Prototyp Stockholm AB

August 2019 – Present

Building web platforms, backend services, and mobile applications in cross-functional teams, from concept to production.

Client projects delivered through Prototyp Stockholm AB.

UNICEF — Fundraising & donation platforms

Full Stack Developer · 3 years

Long-term development of donation platforms connecting fundraising, e-commerce, donor records, and recurring payments.

Integrated the donation platforms with Salesforce for donor records, Saleor for e-commerce, Adyen for payments, and Contentful for content.

Node.js · React.js · TypeScript · Salesforce

- Built and maintained donation and recurring-giving flows across the platform.
- Developed features across Node.js, React, and TypeScript services hosted on Heroku, with image storage on AWS S3.

Stack: Node.js · React.js · TypeScript · Salesforce · Saleor · Adyen · Contentful CMS · Heroku · AWS S3

PlayWellMinds — Mental health & AI coaching app

Mobile & AI App Developer

A Flutter app, live on the App Store, supporting youth athletes with mental health resources and AI-assisted coaching.

Built an AI coaching chat that draws on each user's in-app data and follows the app's coaching guidelines.

Flutter · Dart · BLoC · Firebase

- Added AI-generated reports, using the Vercel AI SDK with Claude and Gemini models for both chat and reports.
- Built the Flutter interface with real-time synchronization through Firestore.

Stack: Flutter · Dart · BLoC · Firebase · Google Cloud · TypeScript · Vercel AI SDK · Claude · Gemini · Contentful CMS

Gapminder — World development education

Full Stack Developer

An interactive web learning tool that helps people test their understanding of world development.

Helped build the quiz engine, the Elixir/Phoenix backend API, and the Vue.js frontend.

Elixir · Phoenix Framework · Vue.js · Nuxt

- Worked on the Contentful integration that lets editors update quiz content without code changes.

Stack: Elixir · Phoenix Framework · Vue.js · Nuxt · Contentful CMS · Tailwind CSS · PostgreSQL
